Critical Thinking for AI
Thinking Beyond the Algorithm

Course Overview

The way we work has changed. Your thinking needs to keep up.

- Are you reviewing AI-generated reports rather than producing them from scratch?
- Are you expected to sense-check insights, summaries or recommendations created by automation?
- Are you navigating a shift in your role, where your value lies less in task execution and more in judgement, oversight and decision-making?
- Are you questioning what this evolution means for your skills, confidence and professional identity?'

Until recently, we told machines what to do. Now machines analyse, recommend and generate outputs that influence our decisions. In the age of AI, the professionals who stand out are those who think clearly, question well and decide responsibly.

Critical thinking is what helps you decide:
- What to trust
- What to question
- What to verify
- What to do next

Critical Thinking for AI strengthens your ability to use AI without outsourcing your judgement.

Who this programme is for:

- Professionals using AI tools and needing to evaluate the quality of outputs
- Managers making decisions in fast-moving, information-heavy environments
- Professionals working in project, product, operations, finance, HR or customer-facing roles
- L&D or HR professional building capability in judgement and responsible AI use
- Professionals who want to reduce mistakes and communicate more clearly

No technical AI knowledge is required.

"Thinking is the hardest work there is, which is probably the reason why so few engage in it."
Henry Ford

Critical Thinking for AI
Thinking Beyond the Algorithm

What You'll Learn and Be Able to Do

By the end of the programme you will be able to:

- Apply practical critical thinking tools to analyse information and recommendations
- Identify assumptions, gaps, weak evidence and false certainty, including in AI outputs
- Recognise cognitive bias and reduce its impact on decisions
- Ask sharper questions to clarify goals, trade-offs and constraints
- Evaluate sources for credibility, relevance and incentives
- Spot common reasoning errors such as cherry-picking or false causation
- Make decisions more confidently under uncertainty
- Sense-check AI-generated content for accuracy, tone and suitability
- Communicate with clearer logic and stronger evidence
- Build a personal critical thinking checklist you can use immediately

Group Bookings - For Organisations

Bring this programme in-house and tailor it to your context, sector and risk landscape, ideal for:

- People managers and leadership cohorts
- Teams adopting AI tools
- Roles working with information, risk or compliance
- Organisations strengthening decision-making capability

Optional add-ons include pre-session diagnostics, tailored case examples and follow-up practice sessions. **Contact us for Group Programme details.**

Why WorkJuggle
WorkJuggle programmes are practical, human and designed for real work.
We focus on tools people can use immediately, supported by structured practice and clear outcomes.

Aoife Garvan, Your Facilitator

Aoife brings fifteen years of experience working with blue chip organisations including LinkedIn and Oracle, across San Francisco, London and Dublin. She has worked with and trained large-scale EMEA sales teams, driving the early adoption of social selling and innovative inbound marketing techniques to mobilise teams for success. Aoife combines commercial insight with a practical, grounded facilitation style, helping professionals build skills they can apply immediately in real workplace contexts.

If you are ready to invest in skills that strengthen how you lead, communicate and collaborate, we would be delighted to welcome you onto the programme.

Places are intentionally limited to protect the quality of discussion and individual attention, so early booking is encouraged.
